

Green cities for climate and water resilience, sustainable economic growth, healthy citizens and environments

From the Green Cities Framework to NBS Strategies

Nature-based-solutions strategies in GrowGreen cities

24th Nov. 2021

Igone Garcia, Project Manager and Senior researcher, Tecnalía

Green Cities Framework

SETTING UP
your process and
CO-DESIGN
your strategy

- Define a vision for your NBS strategy
- Set up your local working group
- Make your stakeholder and citizen engagement plan
- Collaborative design of your strategy

PLANNING
your strategy

- Review your city's governance and policy framework
- Define and identify climate change-related problems
- Assess the current financing available for NBS and additional financing needed
- Identify and assess scenarios for NBS implementation

MOBILISING
your resources

- Identify business models for NBS
- Develop the financial plan for the strategy
- Embed NBS into existing planning instruments
- Develop standards and design criteria for NBS procurement

EVALUATING AND
REPORTING
on your strategy

- Decide on monitoring and data management
- Evaluate, report on and communicate the strategy's impacts

CO-DESIGN
on your NBS project

- Collaborative design of your project

From Green Cities Framework (GCF) to NBS Strategies

Overview of approaches followed in each city

Motivation and political commitment

Different options when materializing the strategies

Governance, business models and planning systems in place as enablers (or constraints) for NBS deployment

How reflecting on NBS Strategy facilitate other initiatives or (climate) action

Importance of reflexive monitoring on planning and on attracting investment

NBS mainstreamed into i.e city master urban plan, other planning's instruments

Social awareness rising, sensibility towards greening city

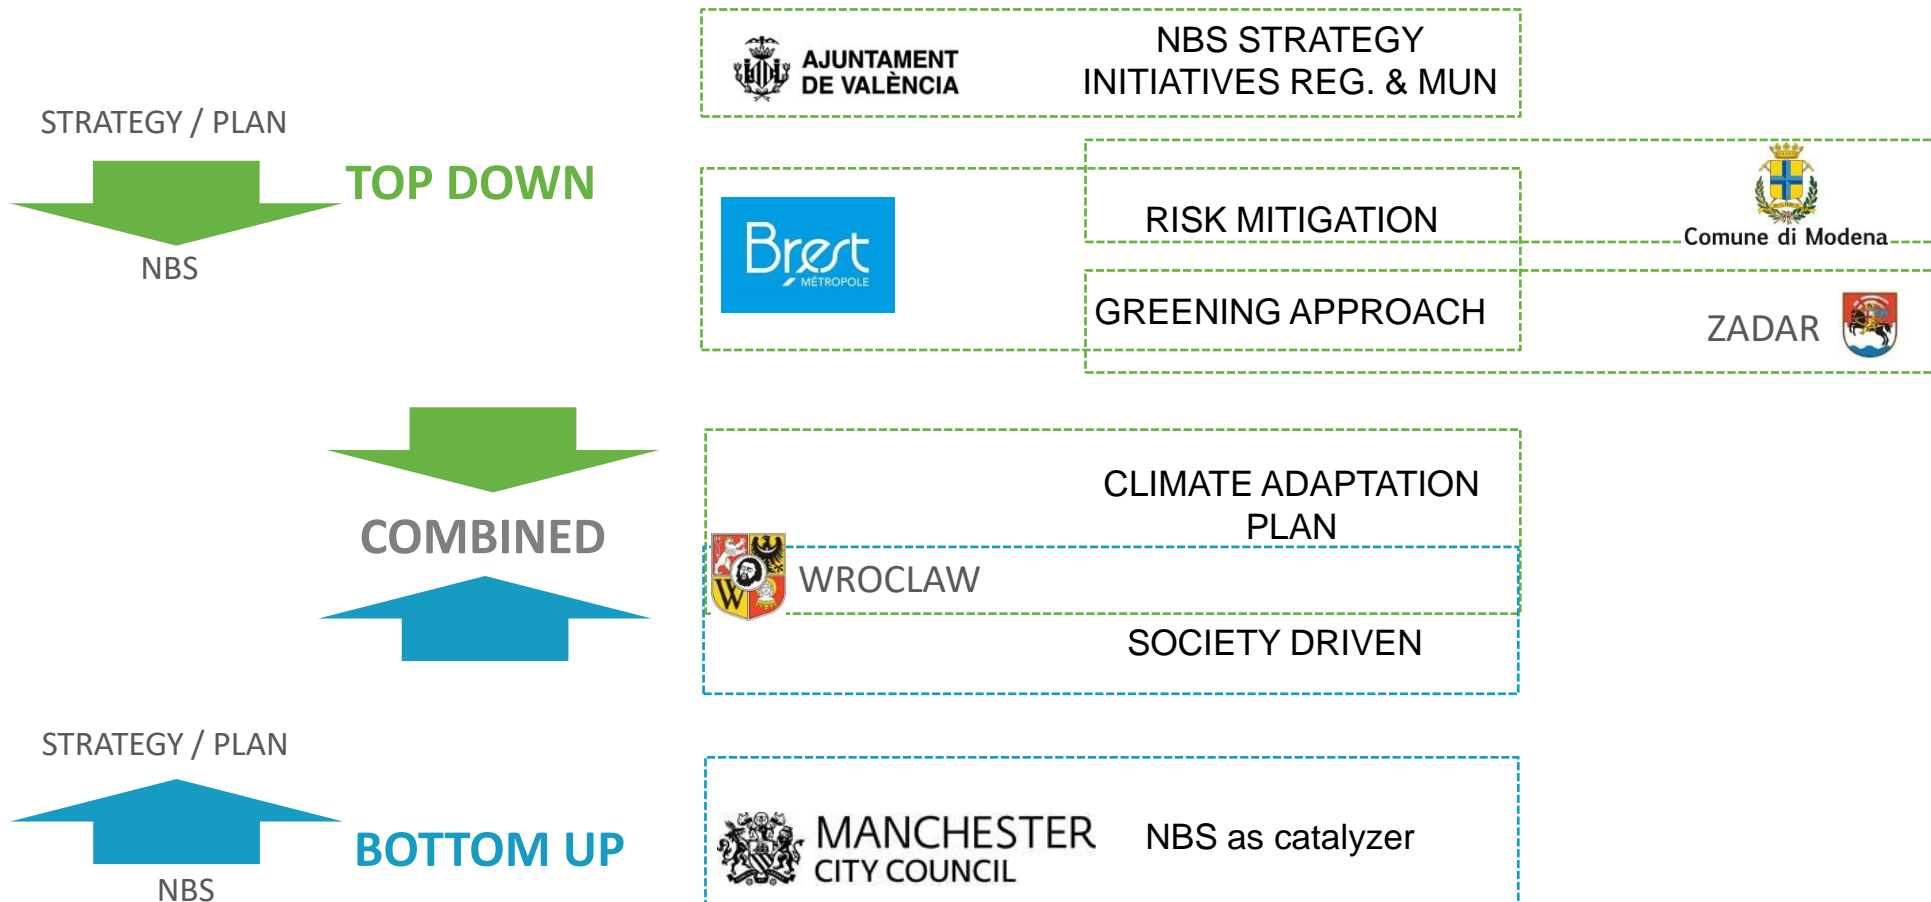

Innovative character of the Strategies (in line with GCF checklist)

Lessons learned: successful histories and potential shortcomings

From GCF to NBS Strategies
